Overview

Software engineer experienced in building large-scale apps using modern tech, tooling, and creativity.

- Worked for both startups and corporations in multinational teams for almost nine years
- Use TypeScript, functional programming, git-flow, and test-driven development for creating easily maintainable and enterprise-grade apps
- Developed two super-scalable UI libraries and for many years closely worked with design teams.
- Mentored 10+ junior developers and have experience teaching React
- Crawled, automated, and mined data from various sources for several years
- Can build landing pages in minutes, integrate analytics and remarketing tools (GA, GTM, Segment, Amplitude, Pixel...) and validate the idea
- Have a good understanding of SEO, analytics, campaigns, UTM tracking, and UX

Experience:

- JavaScript/TypeScript - 9y/3y
- React, NextJS, SSR, Redux (+Thunk), Emotion, StyledComponents - 4y
- React Native - 1y
- NodeJS, Express, NestJS - 3y
- Postgres/MySQL- 7y
- CSS3, CSS Animations - 8y
- UI Libraries and Design Systems - 4y
- RESTful/GraphQL(Apollo) APIs - 6y/2y
- Jest, Unit Testing, CI-CD, ServerLess, Git, Bash - 5y
- AWS, GCP, DO - 3y
- Python, Pandas, NumPy -1y
- PHP, Laravel/AngularJS - 5y/3y

Work experience

Feb 2016 - Present

Senior Software Engineer (Freelance)

Various Clients, Amsterdam

For Klarna, Brenntag, Studio Automated, CarNext (LeasePlan), and Knab (Aegon) developed several web and mobile applications in the last five years using mainly React and modern tech.

- Developed a brand new home page for the Klarna mobile apps that increased app usage by more than six percent
- Led merger of 3 different regional e-commerce apps at Brenntag Corp that significantly decreased development costs and centralized engineering in Amsterdam.
- In record time took the dashboard for managing machine learning software from idea to final product for Studio Automated, so the company could stay competitive on the market and increase revenue.
- At CarNext led the creation of the internal UI framework, which aligned design across all products and accelerated the development.
- Helped team in the adoption of React framework in Knab for the development of a new version of the jQuery-based app, which took 6x less time than the original one

Apr 2012 - Aug 2017

Director & Software Developer

Nixler, Tbilisi, Georgia

The company was a software house in Georgia, where a team of 5 developers and one designer developed projects for clients mainly from Western Europe. Customers included GYPA, Trustalio, GQ International, Energo Pro, and some musicians and artists. In 2014, we operated a marketplace in Georgia, called Nixler which was sold to a German company after two years. In 2012-2013 company also developed and sold over 7000 copies of the most famous music app-building software on Codecanyon (Envato) called Music DB.
